Security Council Committee established pursuant to resolution 1540 (2004)

Letter dated 16 January 2006 from the Permanent Representative of Turkey to the United Nations addressed to the Chairman of the Committee

I am writing to you with reference to the letter dated 15 November 2005, in which further clarifications were requested on the information that Turkey had provided in its first report on the implementation of Security Council resolution 1540 (2004), submitted with our note verbale dated 1 November 2004.

I have the honour to transmit herewith the additional information requested (see annex).

I would like to take this opportunity to assure you that Turkey stands ready to provide any further information that might be required and will continue to engage in a transparent and cooperative dialogue with the Committee.

(*Signed*) Baki İlkin
Ambassador
Permanent Representative

Annex to the letter dated 16 January 2006 from the Permanent Representative of Turkey to the United Nations addressed to the Chairman of the Committee

ARTICLE 90
OF THE CONSTITUTION OF THE REPUBLIC OF TURKEY
(Pertaining to the Ratification of International Treaties (as amended on May 22, 2004))

The ratification of treaties concluded with foreign states and international organisations on behalf of the Republic of Turkey, shall be subject to adoption by the Turkish Grand National Assembly by a law approving the ratification.

Agreements regulating economic, commercial and technical relations, and covering a period of no more than one year, may be put into effect through promulgation, provided they do not entail any financial commitment by the state, and provided they do not infringe upon the status of individuals or upon the property rights of Turkish citizens abroad. In such cases, these agreements must be brought to the knowledge of the Turkish Grand National Assembly within two months of their promulgation.

Agreements in connection with the implementation of an international treaty, and economic, commercial, technical, or administrative agreements which are concluded depending on the authorisation as stated in the law shall not require approval of the Turkish Grand National Assembly. However, agreements concluded under the provision of this paragraph and affecting economic, or commercial relations and the private rights of individuals shall not be put into effect unless promulgated.

Agreements resulting in amendments to Turkish laws shall be subject to the provisions of the first paragraph.

International agreements duly put into effect bear the force of law. No appeal to the Constitutional Court shall be made with regard to these agreements, on the grounds that they are unconstitutional. In case of contradiction between international agreements regarding basic rights and freedoms approved through proper procedure and domestic laws, due to different provisions on the same issue, the provisions of international agreements shall be considered.

TURKISH CRIMINAL CODE NO: 5237

The new Turkish Criminal Code No:5237 which was adopted by the Turkish Grand National Assembly on 26 September 2004 and gained full force of law on 12 October 2004 constitutes the backbone of Turkey's counter-proliferation posture in the internal law. Articles 6, 172, 173 and 174 of the said code are relevant to weapons of mass destruction.

Under **Article 174** which bears the heading "Possessing and Exchanging Dangerous Materials without Permission" the act of causing proliferation of weapons of mass destruction and the materials used in their production is made a crime to be punished with severe penalties.

The first paragraph stipulates that the acts of producing, importing or exporting, transporting from one place to another in the country, keeping, selling, buying or processing radioactive, chemical, biological materials which are explosive, burning, abrasive, injuring, suffocating, poisonous, causing permanent illness in nature, without the permission of competent

authorities, constitute a punishable criminal offence and shall be sentenced to imprisonment from three to eight years and to fines for up to 5000 days.

It further stresses that the act of exporting the substances and equipment needed in the production, operation or utilization of the materials which are in the scope of this article, without the permission of the competent authorities, also constitutes a punishable crime and shall be sentenced to the same penalty. This is inclusive of unlicensed exportation of dual-use items.

Second paragraph focuses on the organized nature of the crime and states that if these acts are committed in the context of an organized crime by an organization which has been formed for performing criminal acts, the penalty to be imposed shall be increased by half.
